ADVANCED TATTOO REMOVAL

As a professional Permanent Make Up artist or Microblader it is important you are ahead of your industry and are able to offer your clients the complete package. Permanent Make Up and body art is a massive industry, but as you can appreciate technicians and artists don't all work the same which therefore is creating very poor substandard work. We are always so sympathetic towards these clients and do want to try our best to create the perfect brow for them, but we are not miracle workers and there is only so much a color corrector and reshape can do. Sometimes we have to except defeat and recommend removal. If you don't offer removal your are just sending them out the door and there business with them. If you are a qualified Permanent Make Up technician and Microblader you can gain comprehensive training, skills and the essential equipment you need to be able to bring removal into your clinic.

** You will need to have an Oron Machine or NPM Handpiece.*
